Kevin Keegan - Founder and President

Kevin has 32 years experience as a mechanic maintaining automobiles, trucks and heavy equipment. Kevin's experience with vacuum trucks began in 1997 when he started a portable toilet and septic company. That company, Affordable Portable Services with two locations in Colorado was sold to United Site Services in December 2003. After 18 months as Division Manager for Colorado, Kevin was promoted to Director of Fleet Operations for United Site Services.
After leaving United in 2007 Kevin started KeeVac Industries Inc. to use his knowledge to help vacuum truck owners improve their efficiency through light weight aluminum tanks mounted on correctly specified chassis. Kevin's personal experience in servicing portable toilets and septic tanks has resulted in numerous improvements for operator ease, operator safety and reduced maintenance costs.
